Projects

Portfolio GitHub Website *2025 – Present*

- Engineered a fully responsive developer portfolio using Next.js, Tailwind CSS and modern JavaScript (ES6+), delivering a fast, accessible UI across devices.
- Integrated external REST APIs and interactive Spline 3D components while building reusable UI with a clean component architecture.
- Optimized performance via image optimization, lazy loading and code splitting; deployed on Vercel with automated CI/CD from GitHub.

Tech: Next.js, Tailwind CSS, JavaScript, Express, MongoDB, Material UI

Event Management System GitHub Website *Sep 2025 – Jan 2026*

- Developed a full-stack platform for creating, organizing and managing events.
- Implemented event creation, attendee management and event tracking features.
- Built a responsive, user-friendly interface for seamless navigation across devices, using clean, reusable components for efficient data management.

Tech: React, Node.js, Express, MongoDB, Tailwind CSS

Hide-Calculator GitHub *Mar 2026 – Sep 2026*

- Developed a React Native mobile calculator app with a hidden, PIN-protected vault that combines everyday calculations with privacy-focused storage.
- Implemented a secure PIN authentication flow that unlocks the vault when the correct PIN is entered.
- Built vault sections for images, videos, downloaded files, camera access and app settings, with a responsive, intuitive mobile interface.

Tech: React Native

Education

Dr. A.P.J. Abdul Kalam Technical University, Lucknow *2023 – 2027*

B.Tech in Computer Science and Engineering

- Pursuing a B.Tech in CSE with a focus on software development and modern web technologies.
- Building practical skills in JavaScript, React, Next.js, Node.js, React Native, databases and full-stack development through academic and personal projects.
